RICHMOND HILL, N.Y.--(BUSINESS WIRE)-- AlayaCare, leading home health software, announced today its partnership and integration with human capital management solution, Viventium, to further support home care organizations in streamlining payroll and HR processes. Viventium is the newest addition to the AlayaSphere – AlayaCare's ecosystem of APIs and third-party integrations. The AlayaCare and Viventium partnership helps solve critical payroll and time management challenges. The goal of this integration is to help agencies automate and reduce time spent on manual payroll and HR processing in order to place more emphasis on other important business initiatives. "Viventium offers a product that is extremely complimentary to AlayaCare," explains Michael Whyte, Partnerships Manager at AlayaCare. "The Viventium platform is able to handle the complexities of the home care market very well and offer functionalities that will make a world of a difference to providers in their everyday operations." The latest partnership allows AlayaCare customers to seamlessly manage their everyday payroll and HR duties through the flexible Viventium software. Viventium compliments AlayaCare's service offerings and helps seamlessly manage cost centers, benefit categories, users, and more all in one place. "Viventium currently serves over 235,000 health services employees in the home care and skilled nursing industries," says Dan Neuburger, CEO at Viventium. "We're excited to continue expanding our presence in healthcare providing the time-saving processes that the home care industry needs now more than ever."
