Viventium Introduces Benefits Administration to Their Suite of HCM Solutions, Providing a Seamless Experience During Open Enrollment

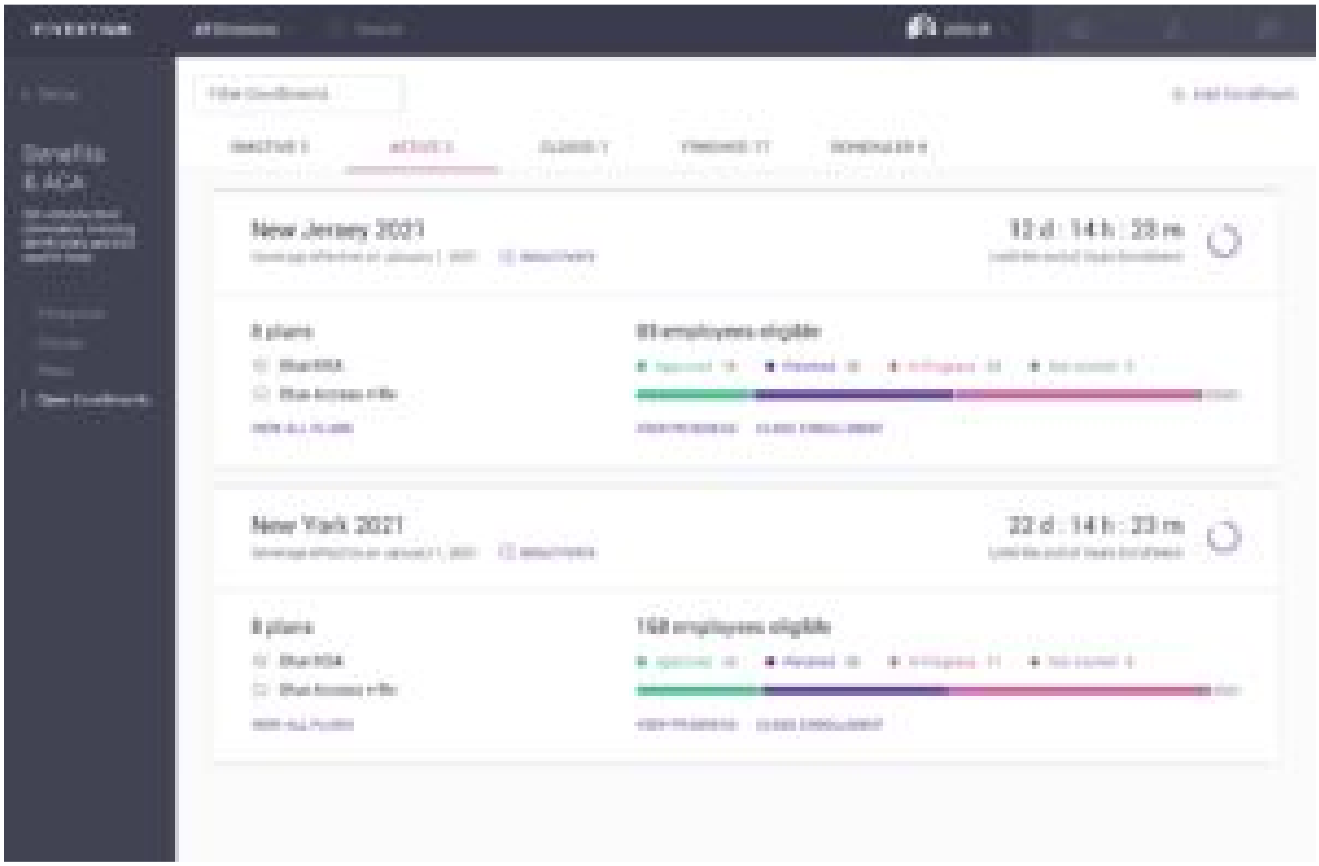

Viventium benefits administration tool improves the accuracy of employee elections by removing manual entry. Data automatically flows into our payroll system with administrator approval.

Published June 8, 2020

BERKELEY HEIGHTS, N.J. – (June 4, 2020) – Viventium – a SaaS-based human capital management solution that provides a remarkable user experience and award-winning technology – proudly announced today the release of a new proprietary HCM tool, *Viventium Benefits Administration*. This new addition to the Viventium suite of products will automate benefits enrollment by enabling employees to make informed benefits elections online, apply deductions to employees' paychecks automatically, and transfer employees' elections to the carrier electronically. "With the addition of

our new *Viventium Benefits Administration* tool to our product suite, we take another step toward making our clients' lives easier," said Dan Neuburger, CEO of Viventium. "We are now able to streamline the benefit enrollment process and tie employee elections directly into our award-winning payroll system." *Viventium Benefits Administration* improves the accuracy of employee elections by removing manual entry. The data automatically flows into the Viventium payroll system with administrator approval. This product also works in tandem with Viventium's ACA product, which was released in 2015, to ensure compliance. *Viventium Benefits Administration* also allows administrators to attach documentation such as Summary Plan Descriptions and Formulary Lists, making it the single source for benefits information. Employees can review these documents and coverage information throughout the year, offloading what was traditionally a manual responsibility of the administrator. "With a full suite of tools designed with input from our valued clients, we have simplified the workstream of the benefit enrollment process, resulting in greater transparency, improved accuracy, and less time spent." Neuburger said. Viventium will continue to add benefits administration functionality, making benefits enrollment a much more automated and user-friendly experience for both the administrator and employees. **About Viventium Software Inc.
