Newly integrated scheduling and time & attendance capabilities further unify Viventium's end-to-end HCM platform, now connecting hiring, HR, workforce management, payroll, and retention to support every stage of the caregiver lifecycle.

Berkley Heights, NJ – September 2, 2026 - Viventium today announced an expansion of its human capital management (HCM) platform through the addition of integrated scheduling and time & attendance capabilities. The enhanced offering extends the connected Viventium + Apploi workforce experience, providing healthcare organizations with greater workforce visibility while reducing the complexity of managing employees across multiple systems.

Healthcare providers continue to face workforce challenges, including staffing shortages, labor cost pressures, employee retention concerns, and growing compliance requirements. Many long-term care organizations still rely on disconnected systems to manage workforce operations, limiting visibility and creating administrative inefficiencies. Time & attendance tracking and workforce scheduling have become increasingly critical functions that directly impact staffing decisions, labor costs, payroll accuracy, employee experience, and quality of care.

Available immediately for skilled nursing and senior living providers, the expanded capabilities provide a more connected approach to workforce operations. By integrating scheduling and time & attendance capabilities within Viventium's unified HCM platform, which already supports recruiting, applicant tracking, onboarding, HR, payroll, compliance, and retention, providers can improve workforce visibility, support more efficient staffing decisions, reduce manual processes, and gain a more complete view of their workforce.

"Healthcare organizations need more than standalone workforce tools," said **Navin Gupta, Chief Executive Officer of Viventium**. "They need connected systems that support caregivers from applicant to employee and from schedule to paycheck. By expanding our workforce capabilities, we're helping providers bring together the information and workflows they need to make more informed staffing decisions, improve operational efficiency, and remain focused on delivering quality care."

The expansion reinforces Viventium's broader vision of providing healthcare organizations with a unified workforce platform built specifically for the industry's operational and compliance needs. As providers increasingly explore workforce analytics, automation, and AI-driven insights, connected workforce data provides a stronger foundation for informed decision-making and long-term workforce optimization.

About Viventium + Apploi

Viventium + Apploi develops award-winning human capital management software for post-acute, behavioral health and ABA organizations of every size, helping providers unlock efficiency and improve the caregiver experience. This hire-to-retire suite was designed exclusively for the industry's unique demands and nuanced rules. Viventium is technology built for healthcare. Because expertise matters.
